

Remote Core SDK

for .NET environment

remotecoresdk.com

by GlavSoft LLC, creators of TightVNC

Remote Core Viewer SDK for .NET belongs to Remote Core SDK product family.

Remote Core SDK (Software Development Kit) is a set of libraries for integrating functionality of remote desktop viewer similar to TightVNC Viewer into various software solutions.

This up-to-date handy tool is a great opportunity to enjoy the enhanced functionality of TightVNC Viewer with modern Ui/Ux design, while the complexity of TightVNC protocol is hidden behind simple and convenient Application Programming Interface (API).

-
- Remote Core Viewer SDK for .NET implements functionality of a TightVNC Viewer for the .NET environment: .NET framework (4.5+) or .NET Core (Windows only) applications.
 - The tool supports desktop and all popular versions of Windows (including Windows server). It works on all the frameworks .NET supports and requires .NET framework versions 3.5 and above (although at least 4.5 is strongly recommended).
 - Remote Core Viewer SDK for .NET includes fully-featured WPF and WinForms GUI components, very easy to integrate with .NET GUI applications and .NET Core 3.1+. However, the easiest way to use the SDK is to integrate its high-level WPF or WinForms components that implement remote desktop and handle most of the work automatically.
-

Why choose Remote Core Viewer SDK for .NET

- **Compatibility**

SDK is compatible with all VNC software that conforms to the standard RFB protocol specification as published in the RFC standards.

- **Performance**

SDK supports all the comprehensive compression algorithms, efficiency improvements and protocol extensions as found in TightVNC Viewer (and more).

- **Updates**

SDK is being actively developed and constantly improved. Also, GlavSoft team use SDK to develop their own software.

- **Reliability**

SDK is developed by the authors of TightVNC Viewer (GlavSoft), which is time-proven and is used by millions of users worldwide.

- **Support**

Our support and product development teams are always there to help you. The software development process and upgrades are based on our customers' feedback.

Fully-functional applications developed with the components of Remote Core Viewer SDK for .NET (included with Maximum license)

TightVNC

a free open-source viewer
used by millions of users
worldwide

MightyViewer

an easy-to-use viewer to
monitor multiple desktops

Source Code

white-label applications
developed with the SDK

Remote Ripple

a modern user-friendly
Tight-VNC viewer

Basic licensing terms

GlavSoft LLC (the copyright holder) offers a perpetual non-exclusive license, either company-wide or based on a number of developer seats to use the software.

The license allows:

- integrating the libraries into proprietary software
- royalty-free distribution of applications built with SDK in the compiled binary form
- modifying the code (if a source code license is acquired)

The license does NOT allow:

- sub-licensing the source code to a third party
- sub-licensing original or modified SDK components to third party developers

See the text of the License Agreement for complete information.

Packages and licensing options

GlavSoft LLC (the copyright holder) offers a perpetual non-exclusive license, either company-wide or based on a number of developer seats to use the software.

For each platform, a separate license is to be purchased, i.e. 1 platform = 1 license.

The following types of Remote Core SDK packages are available:

- **Binary SDK package**
A set of libraries in the form of the binary code.
 - **Source code of the SDK**
SDK package in the form of the source code providing more flexibility and customization options.
Best choice for big corporations and complex target applications.
 - **Complete source code of the Application (Remote Ripple)**
Provides maximum flexibility, customization options, and tools availability, including GUI tools.
-

Pricing

Licenses	Binary	Source Code	Flexible	Maximum
Components				
Binary SDK package	+	+	+	+
Source code of the SDK	—	+	+	+
Complete source code of the Application	—	—	—	+
Characteristics				
Max number of developers	unlimited	unlimited	unlimited	unlimited
Customization ⁽¹⁾	basic license agreement only	basic license agreement only	available	available
License cost	€2,900	€5,900	€9,900+ ⁽²⁾	€20,000 ⁽²⁾

(1) Customization

Our basic license agreement does not limit the number of developers, installations, machines and so on (the condition does not apply to the Startup license of the Binary SDK package). The license is perpetual and royalty-free. You can do almost anything with the software, except distributing the source code to third parties (distributing in compiled form is ok).

For the customizable versions, the text of the License Agreement can be adopted to meet the requirements of the customer, with no changes made to the product.

For more details, please refer to the text of the License Agreement.

(2) The basic price

The final price depends on actual license terms as agreed between GlavSoft and the licensee. The price reflects the balance or rights and obligations of the parties.

Maintenance: support and updates

Licenses	Binary	Source Code	Flexible	Maximum
1-year maintenance subscription ⁽³⁾	20 hours included	20 hours included	20+ hours included	20+ hours included
Additional 1-year maintenance subscription ⁽⁴⁾	€725	€1,475	25% of the license cost	25% of the license cost

(3) 1-year maintenance subscription

GlavSoft offers all licensees 1 (one) year of maintenance (technical support and software updates) at no additional cost.

Updated software shall be distributed on every new official Remote Core SDK release. In case any serious security-related problem is identified, a licensee shall be provided with all relevant information, workarounds and fixes as they become available at GlavSoft.

Technical support services shall be provided by email and shall be limited for all types of licenses but the Flexible and the Maximum ones. Above this limit, technical support services shall be available commercially, on an hourly basis.

(4) Additional 1-year maintenance subscription

After the first year of licensing, maintenance and update services shall be available commercially. Each additional year of support and updates costs 25% of the full license fee if paid before the end of the current maintenance term.
